

2017 Street Reconstruction Project

July 21, 2017

Have a Question?

Throughout the project our team will keep you updated with these periodic newsletters and door hangers. If you have questions that are not answered here, we invite you to reach out to us using the contact information provided below.

Project Contacts	
Dane Eksom Construction Inspector dekdom@wsbeng.com	(612)749-2697
Nick Preisler Construction Manager npreisler@wsbeng.com	(612)269-3706
Lee Gustafson City Engineer lgustafson@wsbeng.com	(763)762-2821

Roadway Construction

Starting July 26 the Contractor will begin final grading for the roadway. There will be no parking allowed during working hours on any of the streets under construction from 7/26 until the road is paved with asphalt. It is critical to the project schedule that you do not park on the streets under construction, and because of this, vehicles may be towed to another location in order to keep the project on schedule.

If you have questions on where you are allowed to park please don't hesitate to contact the construction inspector at the phone number provided.

Roadway Paving

During paving you will notice a dramatic increase in dump truck traffic throughout the area. Please take this into account when you are driving and expected delays.

There isn't a curing period for the asphalt so it is safe to drive on once the Contractor has moved on and the rolling equipment are no longer compacting the asphalt.

Turf Restoration

Soon after paving, new sod will be installed on the disturbed soil throughout the project. The Contractor is required to water the sod for the first 30 days, after that it is up to the property owner to water and maintain. For the best long term health of the new grass, we recommend that you do not cut it for the first 14 days. When it is time to mow you should keep the deck high and leave the new sod long until it has had time to fully establish roots.
